INDEX.

A.

Abel, F. A., note on crystallised binoxide of tin, 119.
Abel, F. A., Report on recent patents connected with the reduction of iron and the manufacture of steel, 125.
Abel, F. A., and C. L. Bloxam, on the valuation of nitre, 107.
Acetate of Allyl, 322.
Acid anchoic, 169.
—— anisic, on the action of sulphuric acid on, by L. Zervas, 211.
—— anisic, preparation of, 212.
—— butyric, a product of the oxidation of Chinese wax by nitric acid, 178.
—— caprylic, a product of the oxidation of Chinese wax by nitric acid, 178.
—— carbonic, estimation of, by absorption with potash, 258.
—— —— quantity of, produced by respiration of animals, 252.
—— —— table showing the distribution of, in dwelling rooms, &c., 269.
—— —— table showing the results of determinations of, in various localities, 268.
—— —— volumetric estimation of atmospheric, by Max Pettenkofer, 289.
—— chlorohydrated sulphuric, 99.
—— citric, action of, in modifying the reactions of various acids and bases, 112.
—— disulphanisolic, 217.
—— disulphophenic, 218.
—— ethylotrithionic, 38, 60.
—— hydriodic, formation of the crystalline compound of, with phosphuretted hydrogen, by A. W. Hofmann, 210.
—— margaric, in human excrements, 166.
—— methylodithionic, 245.
—— nitric, action of, on aporetin, 305.
—— —— action of, on Chinese wax, 167.
—— pimelic, a product of the oxidation of Chinese wax by nitric acid, 175.
—— racemic, retardation of the precipitation of sulphate of baryta by, 117.
—— stearic, in human excrements, 163.
—— suberic, a product of the action of nitric acid on Chinese wax, 174.
Acid, sulphallylic, 321.
—— sulphanisic, 214.
—— sulpho-salicylic, 218.
—— sulphuric, on a compound obtained by the action of fuming, on chloride of phenyl, by L. Hutchings, 102.
—— —— on compounds obtained by the action of anhydrous, on the chlorides of hydrogen and ethyl, by R. Williamson, 97.
—— —— on the action of, on anisic acid, by L. Zervas, 211.
—— tartaric, prevention of precipitation of various substances by, 117.
Acids and Bases, on some remarkable circumstances tending to disguise the presence of various, in chemical analysis, by John Spiller, 110.
—— organo-thionic, on a new series of, by J. T. Hobson, 55, 243.
—— volatile, present in the distillate from Chinese wax and nitric acid, 177.
Adie, R., on some thermo-electric properties of the metals bismuth and antimony when used as single elements, 77.
Agriculture, on the application of sewage to, by D. Campbell, 272.
Air, volumetric estimation of carbonic acid in the, by M. Pettenkofer, 292.
Alcohols, on a new class of, by A. Cahours and A. W. Hofmann, 163.
Algodonite, on, by F. Field, 289.
Allotropic chloride of silver, 242.
Allyl, acetate of, 322.
—— benzoate of, 322.
—— butyrate of, 322.
—— cyanate of, 323.
—— iodide of, 317.
—— oxalate of, 321.
—— sulphide of, 320.
—— valerate of, 322.
Allylamine, 325.
Allylammonias, 324.
Allylic alcohol, 328.
Allylic mercaptan, 320.
Allyloxamethan, 321.
Allyl-potassium-alcohol, 319.
Allyl-urea, 323.
Alum in bread and its detection, by E A. Hadow, 103.
Amido-phenol, 207.
Ammonium, anchoate of, 170.

Analysis, on some remarkable circumstances tending to disguise the presence of various acids and bases in, by John Spiller, 110.
—— on the use of the prism in qualitative, by J. H. Gladstone, 79.
Anchoate of barium, 170.
—— of potassium, acid, 171.
—— —— neutral, 173.
—— of silver, 169.
Anchoates of ammonium, sodium, zinc, copper, lead, mercury, and ethyl, 173.
Antimony, modification of the reactions of, by citric acid, 116.
——, thermo-electric properties of, 77.
Aporetin, action of nitric acid on, 305.
Appendix to Lawes' and Gilbert's paper, (p. 1.) "On some points in the composition of wheat-grain," &c., 269
Arsenic, modification of the reactions of, by citric acid, 116.
Ash of wheat-grain, analysis of, 17.
Atmosphere of dwelling houses, some chemical facts respecting the, by H. E. Roscoe, 251.

B.

Balance-sheet of the Chemical Society, 1856-7, 190.
Barium, anchoate of, 173.
—— sulphanisate of, 214.
Baryta, ethylotrithionate of, 59.
—— methylodithionate of, 246.
—— prevention of the precipitation of, by citric acid, 112.
Beef, on the juice of, by C. L. Bloxam, 153.
Bessemer's process for the manufacture of iron, 142, 151.
Binoxide of tin, note on crystallised, by F. A. Abel, 119.
Bismuth, modification of the reactions of, by citric acid, 116.
—— thermo-electric properties of, 77.
Bistearate of soda in human excrements, 164.
Bloxam, C. L., on the juice of beef, 153.
Bloxam, C. L., and F. A. Abel, on the valuation of nitre, 107.
Bread, on alum in, and its detection, by E. A. Hadow, 103.
—— on some points in the composition of wheat-grain, its products in the mill, and, by J. B. Lawes and J. H. Gilbert, 1, 269.
—— table showing the composition of, and the quantity obtained from different samples of flour, 42.
—— table showing the composition of wheaten, 271.
Bromide of silver, 241.
Bromine, separation of, from iodine and chlorine, 234.
Brown, E. O., on a new volumetric method for the determination of copper, 65.
Buckton, G. B., on some of the products of the oxidation of Chinese wax, 166.
Burlington House, negociations respecting the occupation of, by the Royal, Linnæan, and Chemical Societies, 180.
Butyrate of allyl, 322.
Benzoate of allyl, 322.

C.

Cadmium, modification of the reactions of, by citric acid, 116.
Cahours, A. and A. W. Hofmann, on a new class of alcohols, 316.
Campbell, D., on the application of sewage to agriculture, 272.
Chinese wax, action of nitric acid on, 167.
—— on some of the products of oxidation of, by G. B. Buckton, 166.
—— volatile acids present in the distillate from, and nitric acid, 177.
Chloride of phenyl, on a compound obtained by the action of fuming sulphuric acid on, by L. Hutchings, 102.
—— of silver, crystallised or allotropic, 242.
—— —— on the action of light on the, by F. Guthrie, 74.
Chlorides of hydrogen and ethyl, on compounds obtained by the action of anhydrous sulphuric acid on the, by R. Wiliamson, 97.
Chlorine, separation of, from bromine and iodine, 234.
Chlorobromide of silver, 239, 240.
Chlorohydrated sulphuric acid, 99.
Chlorosulphate of ethyl, 100.
Chromates, chromatic phenomena of, 87.
Chromium, modification of the reactions of, by citric acid, 113.
Chromium-salts, chromatic phenomena of, 82.
Chrysophane, preparation of, 300.
—— properties of, 302.
Cobalt-salts, chromatic phenomena of, 83.
Cobalt, modification of the reactions of, by citric acid, 114.
Copper, anchoate of, 173.
—— ethylotrithionate of, 63.
—— methylodithionate of, 250.
—— modification of the reactions of, by citric acid, 116.

Copper, on a new volumetric method for the estimation of, by E. O. Brown, 65.
—— remarks on the action of heat on gold, and on its alloy with, by J. Napier, 229.
Copper-salts, chromatic phenomena of, 84.
Crystallised chloride of silver, 242.
—— iodide of silver, 243.
Cyanate of allyl, 323.

D.

De la Rue, Warren, and H. Müller, on some constituents of rhubarb, 297.
Diallylamine, 326.
Diallyl-urea, 324.
Didymium, on an optical test for, by J. H. Gladstone, 219.
Diffusion of gases through brick and mortar walls, 256.
Dwelling-houses, some chemical facts respecting the atmosphere of, by H. E. Roscoe, 251.
Dwelling-rooms, distribution of carbonic acid in, 269.

E.

Emodin, 304.
Ether; ethylotrithionic, 63.
Ether methylodithionic, 249.
Ethers, allylic, 319.
Ethyl, anchoate of, 173.
Ethyl and hydrogen, on compounds obtained by the action of sulphuric acid on the chlorides of, by R. Williamson, 97.
Ethyl, chlorosulphate of, 101.
—— methylodithionate of, 249.
Ethyl-allyl-urea, 323.
Ethylotrithionate of baryta, 59.
—— of copper, 62.
—— of ethyl, 63.
—— of silver, 61.
—— of soda, 63.
—— of zinc, 58.
Ethylotrithionic acid, 59.
—— ether, 63.
Excrements, on the fatty matters of human, in disease, by W. Marcet, 163.

F.

Ferric salts, chromatic phenomena of, 85.
Field, F., on algodonite, a new mineral containing arsenic and copper, 289.
—— on the separation of iodine, bromine and chlorine, and the comparative degree of affinity of these elements for silver, with some analyses of their combinations with that metal occurring in Chili, 234.
Flesh, on a new base from the juice of, by A. Strecker, 121.
Flour, percentage of gluten in, 48.
Food, composition of standard articles of, 53.

G.

Garlic, essence of, 320.
Gaseous diffusion through brick and mortar walls, 256.
Gerhardt, Charles, obituary notice of, 187.
Gilbert, J. H. and J. B. Lawes, on some points in the composition of wheat-grain, its products in the mill and bread, 1, 269.
Gladstone, J. H., on an optical test for didymium, 219.
—— on the use of the prism in qualitative analysis, 79.
Gluten, percentage of, in different flours, 48.
Gold, modification of the reactions of, by citric acid, 117.
—— remarks on the action of heat on, and its alloy with copper, by J. Napier, 229.
Grape-sugar, prevention of precipitation of sulphide of manganese by, 117.
Gurlt's process for the manufacture of iron, 132, 151.
Guthrie, F., on the action of light on the chloride of silver, 74.

H.

Hadow, E. A., notes on alum in bread, and its detection, 102.
Hobson, J. T., on a new series of organothionic acids, 55.
Hofmann, A. W., contributions towards the history of thialdine, 193.
—— Miscellaneous observations:
I. On nitrophenol, 203.
II. On a new mode of forming triethylamine, 208.
III. Formation of the crystalline compound of hydriodic acid and phosphuretted hydrogen, 210.
Hofmann, A. W. and A. Cahours, on a new class of alcohols, 316.
Hutchings, L., on a compound obtained by action of fuming sulphuric acid on the chloride of phenyl, 102.
Hydrogen and ethyl, on compounds obtained by the action of anhydrous sulphuric acid on the chlorides of, by R. Williamson, 97.

I.

Iodide of allyl, 317.
—— of silver, 241.
—— of tetrallyl-arsonium, 327.
Iodine, separation of, from bromine and chlorine, 234.
Iron, modification of the reactions of, by citric acid, 113.
—— report on recent patents connected with the reduction of, and the manufacture of steel, by F. A. Abel, 125.
Irrigation by sewage-water, 287.

L.

Lawes, J. B. and J. H. Gilbert, on some points in the composition of wheat-grain, its products in the mill, and bread, 1, 269.
Lead, anchoate of, 173.
—— modification of the reactions of, by citric acid, 114.
—— sulphanisate of, 212.
Letter from the Secretary of the Treasury to the President of the Royal Society, respecting the occupation of Burlington House, 181.
Leucine, alleged formation of, from thialdine, 199—202.
Light, on the action of, on chloride of silver, by F. Guthrie, 74.
Lime, methylodithionate of, 248.
—— prevention of the precipitation of by citric acid, 112.
Litmus, chromatic phenomena of, 88.

M.

Macvicar, J. G., notice of a new maximum and minimum mercurial thermometer, 221.
Magnesia, methylodithionate of, 247.
—— modification of the reactions of, by citric acid, 113.
Manganese, modification of the reactions of, by citric acid, 114.
—— prevention of precipitation of sulphide of, by grape-sugar, 117.
Manures, analysis of, prepared from sewage, 282.
Manurial value of town-sewage, 278.
Marcet, W., on the fatty matters of human excrements in disease, 163.
Mercaptan, allylic, 320.
Mercuricum, anchoate of, 173.
Mercurosum, anchoate of, 173.
Mercury, modification of the reactions of, by citric acid, 115.
Methylodithionate of baryta, 246.
—— copper, 250.
—— ethyl, 249.
—— lime, 248.
—— magnesia, 247.
—— nickel, 250.
—— silver, 249.
—— zinc, 245.
Methylodithionic acid, 245.
—— ether, 249.
Methyl-thialdine, 194.
Mill-products of wheat grain, percentage of nitrogen in, 30.
Müller, H., and Warren De la Rue on some constituents of rhubarb, 297.
Murray, Robert, obituary notice of, 191.

N.

Napier, J., remarks on the action of heat on gold, and on its alloy with copper, 229.
Nickel, methylodithionate of, 251.
—— modification of the reactions of, by citric acid, 114.
Nitre, on the valuation of, by F. A. Abel and C. L. Bloxam, 107.
Nitrogen, percentage of, in mill-products of wheat grain, 30.
—— —— in the dry matter of wheat-grain grown at Rothamstead, 10.
—— —— in the products of wheat-grain from the colonial steel hand-mill 37.
Nitrophenol, alkaline salts of, 206.
—— on, by A. W. Hofmann, 203.

O.

Obituary notice of Charles Gerhardt, 187.
—— —— Robert Murray, 191.
Optical test for didymium, by J. H. Gladstone, 219.
Organo-thionic acids, on a new series of, by J. T. Hobson, 55, 243.
Oxalate of allyl, 321.

P.

Pettenkofer, Max, on a volumetric method of estimating atmospheric carbonic acid, 292.
Phenyl, on a compound obtained by the action of fuming sulphuric acid on chloride of, by L. Hutchings, 102.

Phosphuretted hydrogen, formation of the crystalline compound of hydriodic acid and, by A. W. Hofmann, 210.
Platinum, modification of the reactions of, by citric acid, 117.
Potassium, anchoates of, 171, 173.
Prism, on the use of, in qualitative analysis, by J. H. Gladstone, 79.
Proceedings at the meetings of the Chemical Society, 93, 180.

Q.

Qualitative analysis, on the use of the prism in, 79.

R.

Report of the President and Council of the Chemical Society, 180.
—— on recent patents connected with the reduction of iron and the manufacture of steel, F. A. Abel, 125.
—— on the application of sewage to agriculture, by D. Campbell, 272.
Respiration of animals, quantity of carbonic acid produced by, 252.
—— quantity of air required for, 254.
Rhubarb, on some constituents of, by Warren De la Rue, and Hugo Müller, 297.
Roscoe, H. E., on some chemical facts respecting the atmosphere of dwelling houses, 251.
Royal Society, extract of minutes of the Council of, December 18, 1856, respecting the occupation of Burlington House, 182.

S.

Salts, each constituent of which is coloured, chromatic phenomena of, 89.
Sarcine, 121.
Sewage, analysis of Edinburgh, 286.
—— analysis of manures prepared from, 282.
—— on the application of, to agriculture, by D. Campbell, 272.
Sewage-water, irrigation by, 287.
Sewage Works at Croydon, 284.
Siver, anchoate of, 169.
—— bromide of, 241.
—— chloro-bromide of, 239–240.
—— crystallised chloride of, 242.
—— —— iodide of, 243.
—— ethylotrithionate of, 61.
—— iodide of, 241.
—— methylodithionate of, 249.
—— modification of the reactions of, by citric acid, 114.
Silver, on the action of light on the chloride of, by F. Guthrie, 74.
—— on the separation of iodine, bromine and chlorine, and the comparative degree of these elements for, with some analyses of their combinations with that metal occurring in Chili, 234.
Sinapoline, 324,
Soda, bistearate of, in human excrements, 164.
—— ethylotrithionate of, 63.
Sodium, anchoate of, 173.
Spiller, John, on some remarkable circumstances tending to disguise the presence of various acids and bases in chemical analysis, 110.
Steel, report on recent patents connected with the reduction of iron and the manufacture of, by F. A. Abel, 125.
Strecker, A., on a new base from the juice of flesh, 121.
Strontia, prevention of the precipitation of, by citric acid, 112.
Sulphanisate of barium, 214.
—— of lead, 212.
Sulphide of allyl, 320.

T.

Taylor, J., remarks on Bessemer's process for the manufacture of iron, 151.
Tetrallylammonium, hydrated oxide of, 326.
Tetrallylarsonium, iodide of, 327.
Thermo-electric properties of bismuth and antimony when used as single elements, by R. Adie, 77.
Thermometer, notice of a new maximum and minimum mercurial, by J. G. Macvicar, 221.
Thialdine, alleged transformation of, into leucine, 199, 202.
—— contributions towards the history of, by A. W. Hofmann, 193.
Thomson, J., analysis of the Tunbridge Wells water, 223.
Tin, modification of the reactions of, by citric acid, 116.
—— note on crystallised binoxide of, by F. A. Abel, 119.
Tincture of rhubarb, investigation of a deposit found in, by Warren De la Rue and Hugo Müller, 297.
Town-sewage, manurial value of, 278.
Triallylamine, 326.
Triethylamine, new mode of forming, by A. W. Hofmann. 208.

U.

Uranium, modification of the reactions of, by citric acid, 114.

V.

Valerate of allyl, 322.
Ventilation, chemical and physical methods of determining the amount of, 260.
Volumetric estimation of atmospheric carbonic acid, by Max Pettenkofer, 292.
Volumetric method for the determination of copper, by E. O. Brown, 65.

W.

Water, analysis of the Tunbridge Wells, by J. Thomson, 223.
Wax, on some of the products of oxidation of Chinese, by G. B. Buckton, 166.
Wheat-grain ash, analysis of, 17.
—— composition of the products of, from the Colonial steel hand-mill, 38.
—— on some points in the composition of, its products in the mill, and bread, by J. B. Lawes and J. H. Gilbert, 1, 269.
Wheat-grain, percentage of nitrogen in mill products of, 30.
—— percentage of nitrogen in the dry matter of, grown at Rothamstead, 10.
—— percentage of nitrogen in the products of, from the Colonial steel hand-mill, 37.
Williamson Robert, on some compounds obtained by the action of anhydrous sulphuric acid, on the chlorides of hydrogen and ethyl, 97.
Worsley, P. J., remarks on Dr. Gurlt's process for the manufacture of iron 151.

Z.

Zinc, anchoate of, 173.
—— ethylotrithionate of, 58.
—— modification of the reactions of, by citric acid, 114.
Zervas, L., on the action of sulphuric acid on anisic acid, 211.
Zinc, methylodithionate of, 245.

END OF VOL. X.
